Note; all abnormal cases will be shown through videos and covered in lecture classes

Normal male abdomen handson & minimal abnormalities will be shown to training doctors
uterus and ovaries will not be covered in this programme

Our Objectives;

We have scheduled the course in such a way that doctors get theory & practical knowledge of what they desire to learn

We want to fulfil the Dream of busy practitioners, who wish to learn abdomen ultrasound & adult echocardiography, unfortunately could not pursue due to time constraints.

this 1 day course is unimaginable, unbelievable, but fortunate, that our doctor madam has come out with a one stop solution for diagnostic challenges in 1 day

FEES STRUCTURE:

15 thousand for each one day course:
adult echocardiography/abdomen

ADVANTAGES OF THE COURSE:

11

- 1.Any emergencies can be handled instead of waiting for a radiologist to come and give the diagnosis
- 2.Equipping ourselves with one new field is something great ,especially in a medical profession
- 3.It has lots of societal benefits too -service to humanity
- 4.Right from day one after doing this one day course, we assure you to start doing ultrasound and adult echocardiography with confidence at your place.
